WinTOMO 1.5

Tomography interpretation for Windows 62/32 bits®

This very user-friendly program has been designed for the crosshole
seismic interpretation using SIRT algorithm.

WinTomo soft is a Window adaptation using BOMTOM algorithms of Daryl
TWENTON, US BUREAU OF MINES, MINNEAPOLIS, MN

- Field record conversion from most common seismograph
- Picking module included
- Easy data input (link with EXCEL and picking module)
- Nice color plots, saved as WMF, JPG or print
- Link with SURFER to plot with your own specifications
- Demo data and online manual

WinTomo is a freeware, just ask for a activation code.
